# Read Me First

VOCALOID Authorizer is a tool which can authorize and deauthorize almost all the VOCALOID Editor products, Plugin products and Voice bank products released after VOCALOID3. This manual provides a guide to the procedures to install and uninstall VOCALOID Authorizer and to authorize and deauthorize products with it.

- **Items to check before installation:**
  - Serial Code

    The serial code is described in the email sent when you downloaded and purchased the software.
  - Internet Environment

    Your computer must be connected to the internet using a TLS 1.2 encryption protocol or later to authorize VOCALOID products.

- **NOTES:**
  - User Licensing
    - This tool can only be used by customers who have agreed to the End User License Agreement.
    - Please be sure to read and agree to the License Agreement before installing this tool.
  - Operating Environment
    - The operating environment required to use this tool is described on the download page of the official website below, so be sure to review it before use.
      - https://www.vocaloid.com/en/support/download/vocaloid_authorizer/
    - Please note that we cannot guarantee proper operation if used in any other operating environment. Additionally, even when used in the operating environment described, it may not be possible to use the product due to differences in settings and installed software and other elements specific to your environment.
    - Not all operations are guaranteed to work, even in an environment that meets the described conditions.
  - Authorizable products
    - This tool can authorize or deauthorize almost all editor, plugin and voice bank products released after VOCALOID3.
    - Products that cannot be authorized and deauthorized with this tool are as follows.
      - Editor and voice bank products released before VOCALOID3.
      - 32bit edition of VOCALOID4 Editor for Cubase. (The 64bit edition can be authorized.)
  - Installation destination and user account
    - This tool must be installed on the same computer as the product to be authorized and with the same user account as the user who installed the product.
    - If the computer or user account is different from the one for the product to be authorized, authorization will not be performed correctly.
  - Customer Support
    - Please direct inquiries about this tool to our dedicated support center.
    - Yamaha's VOCALOID Products Customer Center (https://www.vocaloid.com/en/support/)
  - Manual
    - Screen shots used in the Installation and Uninstallation section of this manual are from macOS 13 and Windows 11. As authorization and deauthorization is almost the same on macOS and Windows, screen shots for this process are from Windows 11 only.

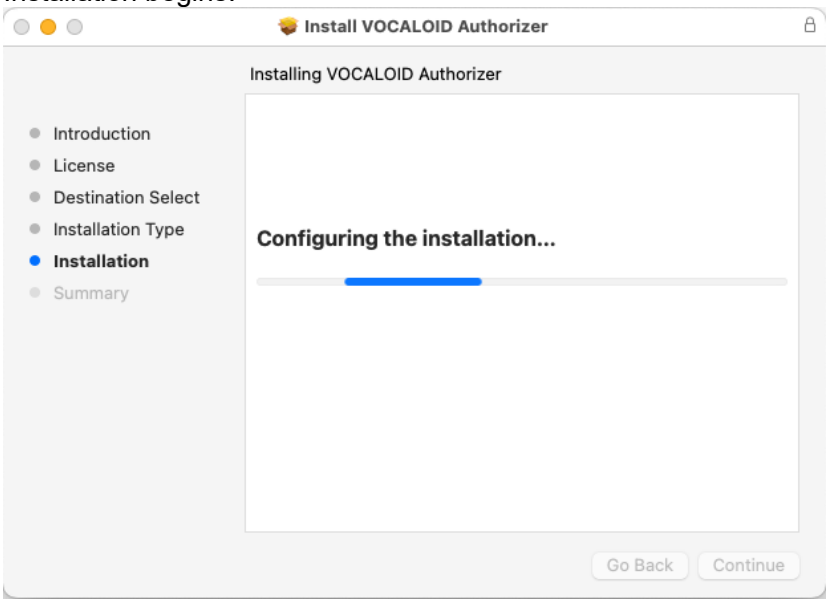
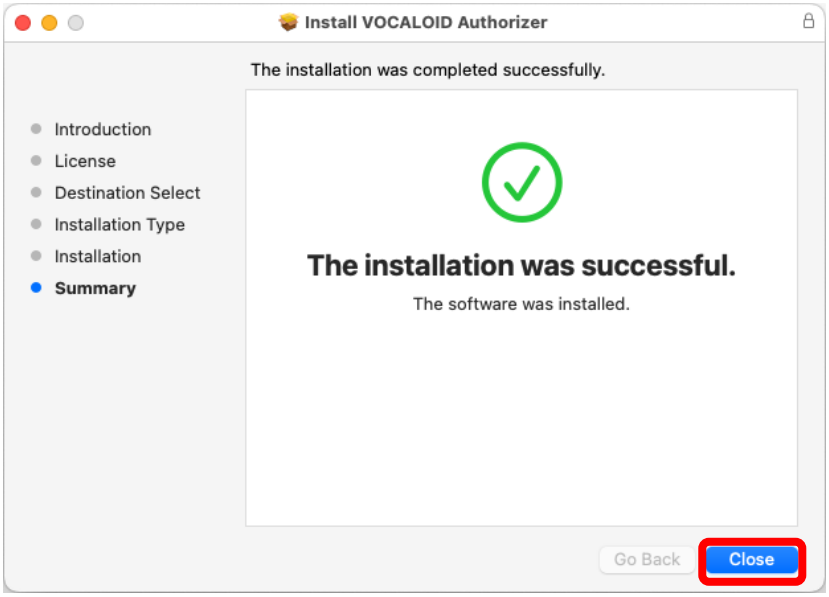
Install

7. **Enter a username and password, and then click “Install Software”.**

Installation begins.



The following window appears when installation finishes. Click “Close” to close the installer.

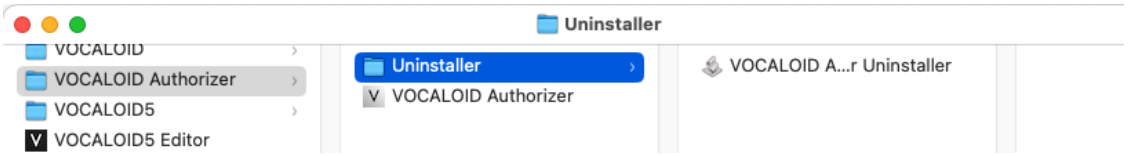


This completes installation.

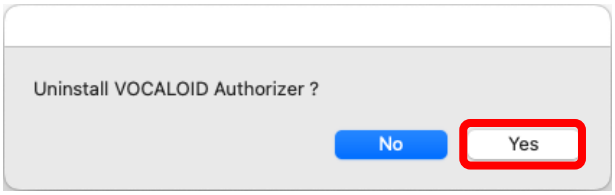
## Uninstallation

1. **The uninstaller for VOCALOID Authorizer is in the below folder under "Applications."**

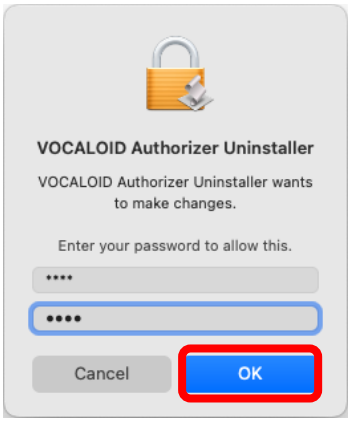
   **("VOCALOID Authorizer" → "Uninstaller")**



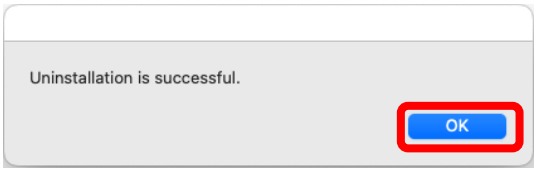
2. **Start the uninstaller, and then click "Yes".**



3. **Enter a username and password, and then click "OK".**



4. **Click "OK".**



This completes uninstallation.

*** Be sure to use the uninstaller to uninstall. If you simply place the files in the trash, the information installed on your system will not be removed correctly, and the installer will not work properly the next time you reinstall.**

# Windows

## Installation

As the downloaded file is a ZIP file, please double-click it to open it before starting installation.

1. **Double-click the installation file (EXE file).**
   Double-click the ″setup.exe″ file to start installer.

If a dialog box showing the message “Do you want to allow this app to make changes to your device?” appears, make sure that “YAMAHA CORPORATION” is shown in the “Verified publisher” field and then click “Yes”.

This completes uninstallation.

# Authorization

## Authorization of Products

In order to use VOCALOID Editor products, Plugin products and Voice bank products, install the files and then authorize the product by accessing the VOCALOID authorization server via the internet. Although there are products that can be used for a certain period without authorization, they can no longer be used once that period expires. Be sure to authorize the product to continue to use it.

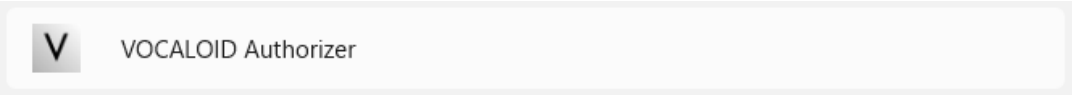
## Notes on Authorization

Your computer must be connected to the internet to perform authorization. Additionally, the computer and user account running this tool must be the same computer and user account on which the product being authorized is running.

| If the computer that the product being authorized is installed on is connected to the internet: | If the computer that product being authorized is installed on is not connected to the internet: |
|---|---|
| You can perform authorization as-is on the computer on which the product was installed. For details, see “Online Authorization Procedure” below. | Use a different computer, which is connected to the internet, to perform authorization. For details, see “Offline Authorization Procedure” below. |

## Online Authorization Procedure

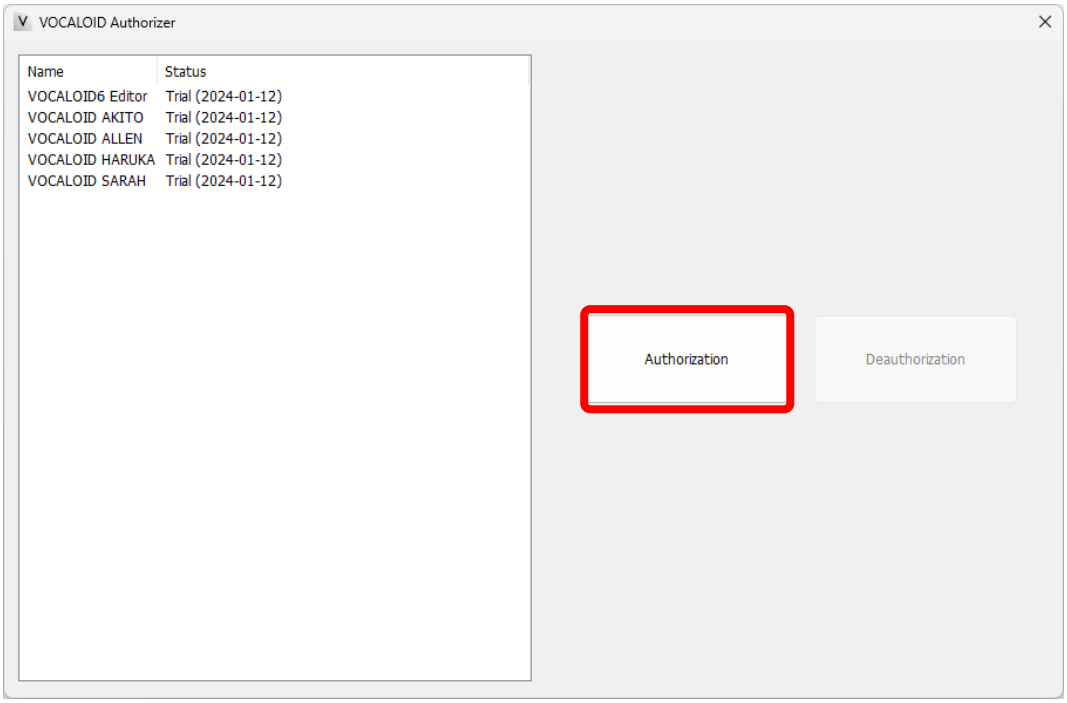
1. **Start VOCALOID Authorizer.**



On Windows, start the tool from Start menu → “VOCALOID” → ”VOCALOID Authorizer”.

On macOS, start the tool from “Application” → “VOCALOID” → ”VOCALOID Authorizer”.

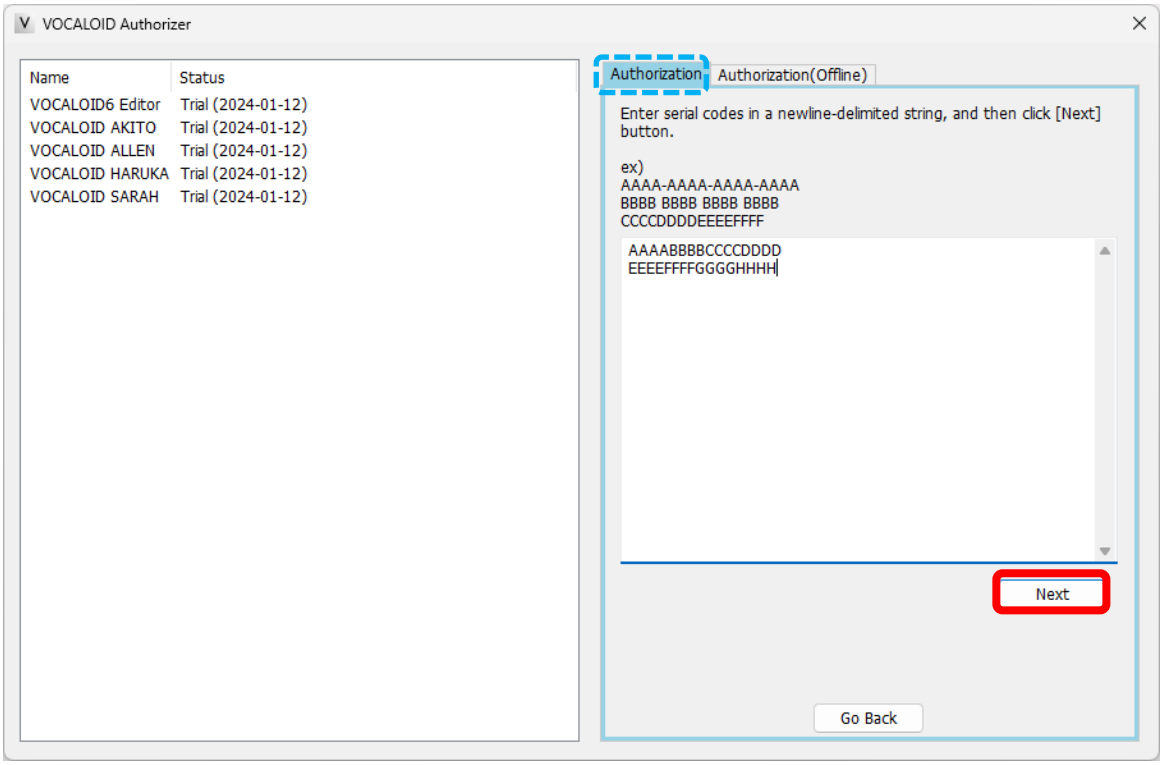
2. **Click “Authorization”.**



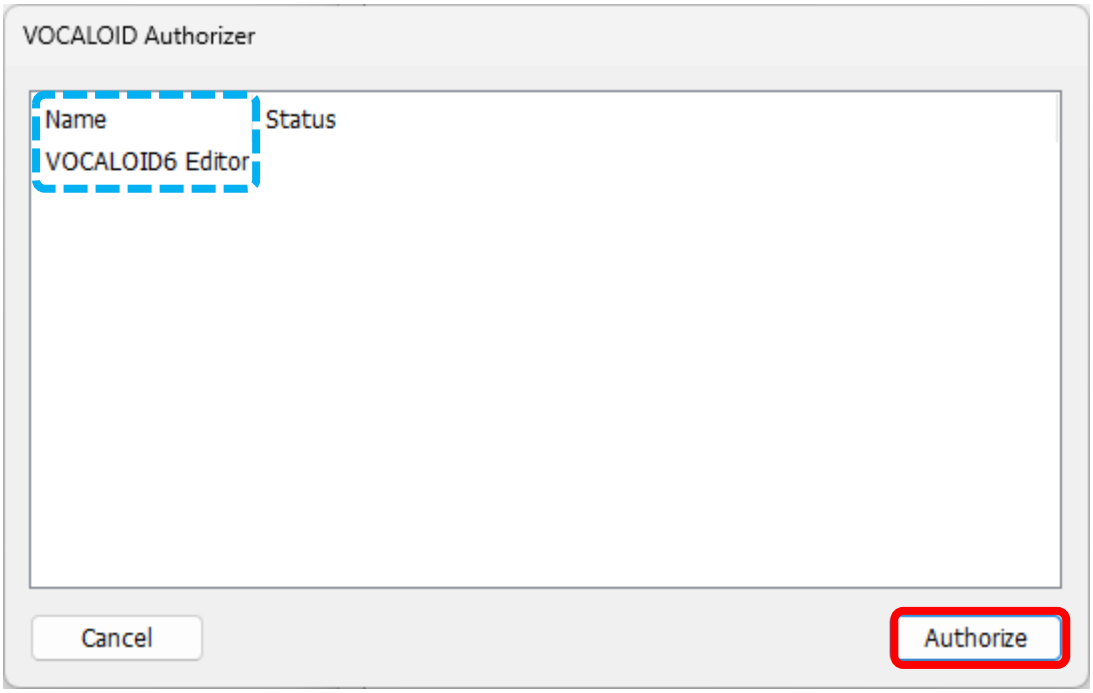
3. **Make sure the tab is set to “Authorization”.**

4. **Enter the serial code and click “Next”.**

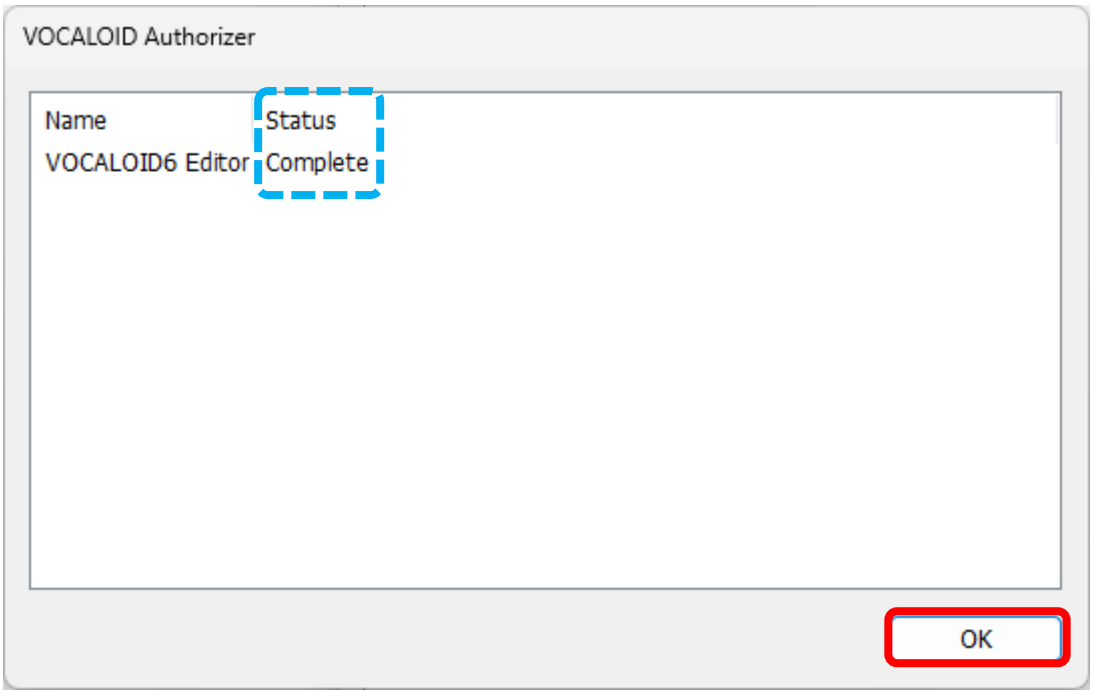
   Several serial codes can be authorized at the same time by entering them as shown below.



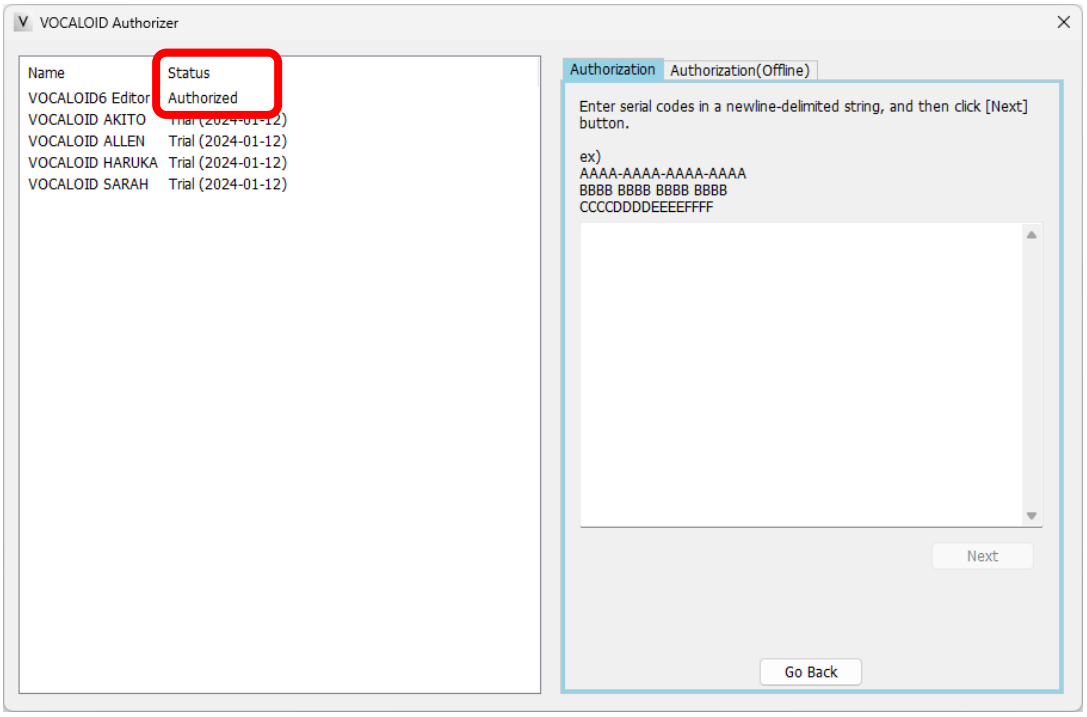
5. **Check the names of components to be authorized and click “Authorize”.**



6. **Check and make sure the status in the list “Complete” and then click “OK”.**



7. **Make sure the status of the components is “Authorized”.**

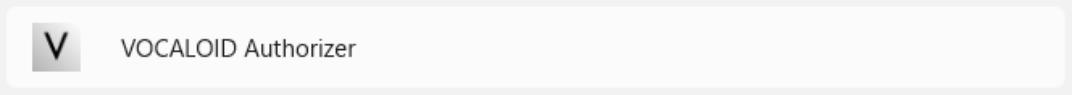


This completes the online authorization procedure. Close VOCALOID Authorizer.

## Offline Authorization Procedure

Please use offline authorization only if the computer on which you installed the product cannot connect to the Internet. In addition to the computer where you installed the product, offline authorization requires a second computer which can connect to the internet. You will also need an external storage device such as a USB memory stick to copy files, so please prepare it in advance.

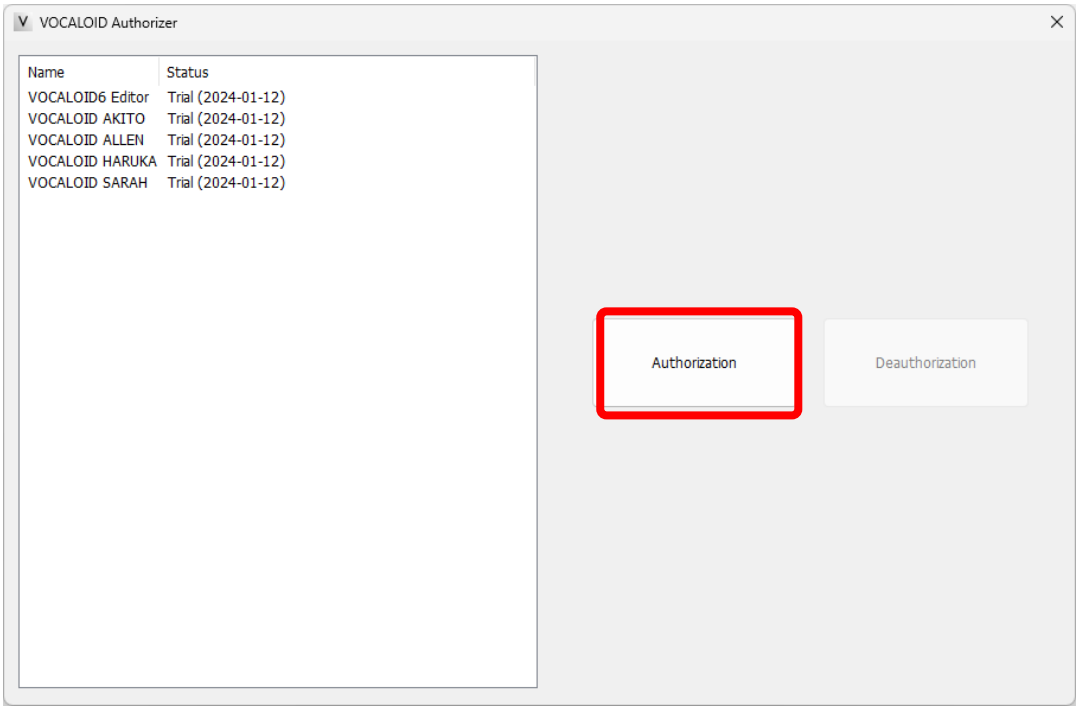
1. **Start VOCALOID Authorizer.**



On Windows, start the tool from Start menu → “VOCALOID” → ”VOCALOID Authorizer”.

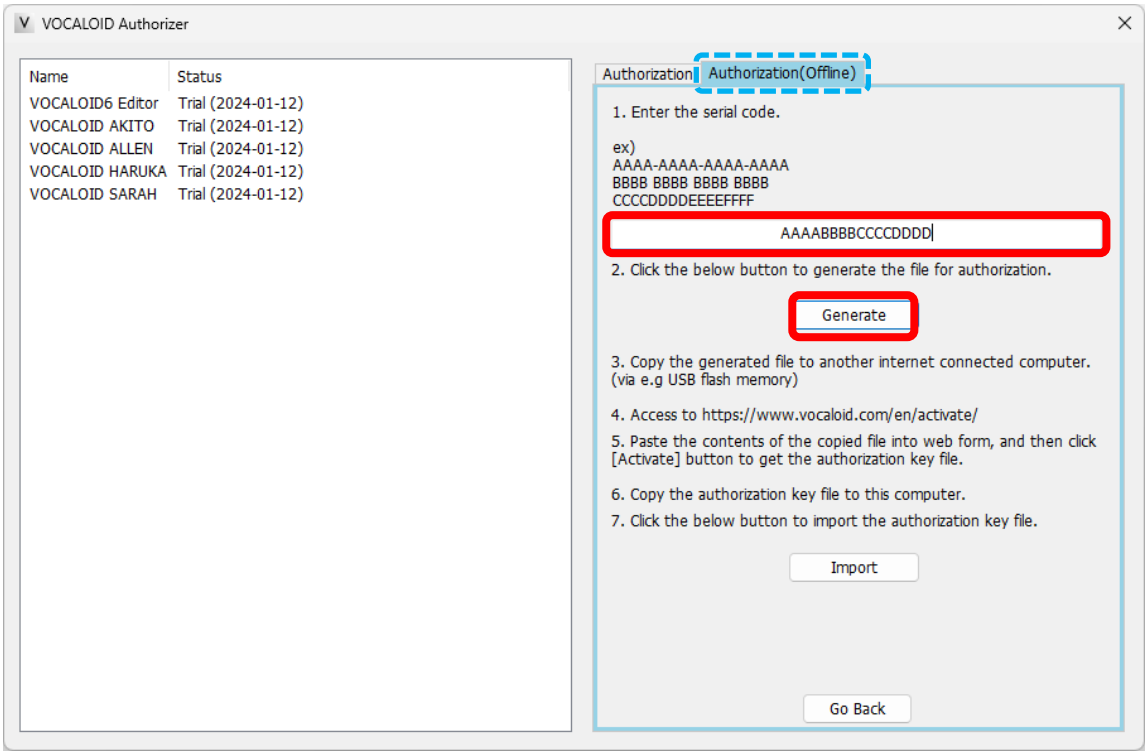
On macOS, start the tool from “Application” → “VOCALOID” → ”VOCALOID Authorizer”.

2. **Click “Authorization”.**

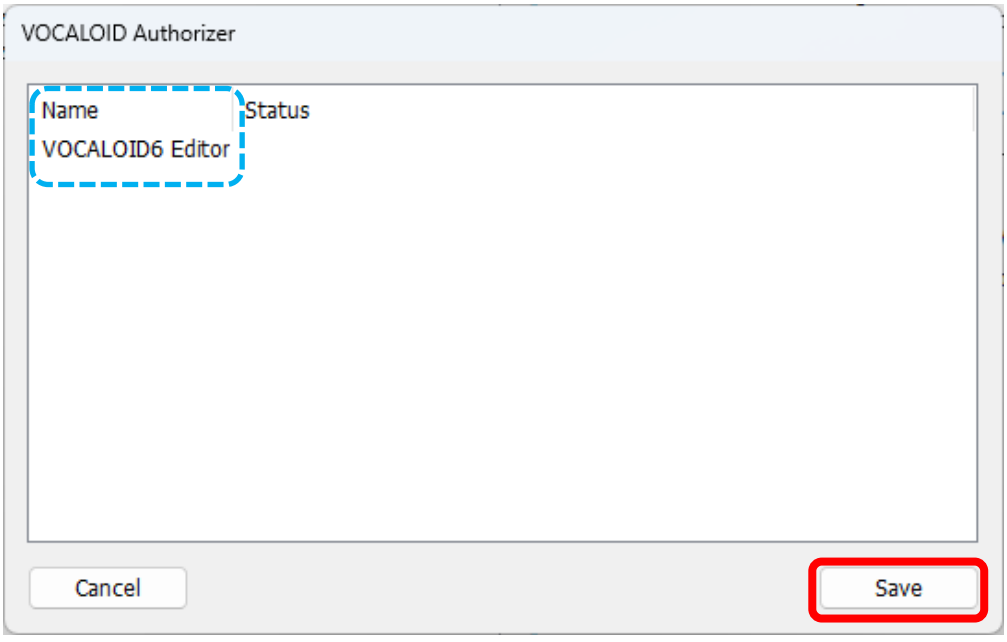


3. **Click “Authorization(Offline)” tab.**

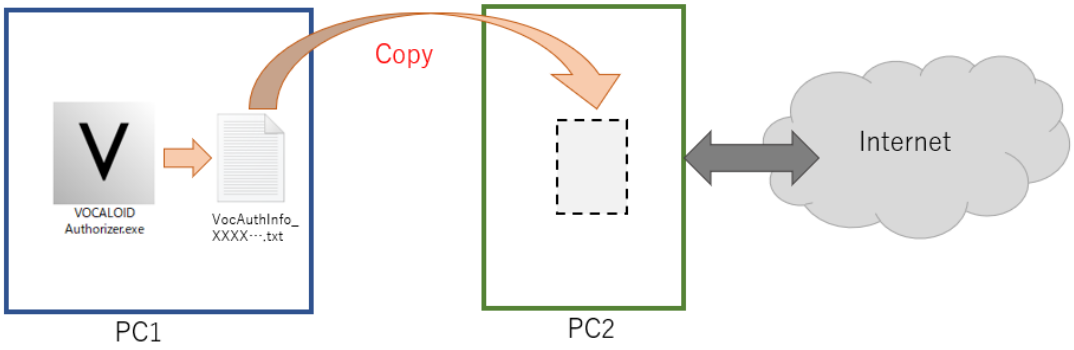
4. **Enter the serial code and click “Generate”.**



5. **Check the name of component to be authorized and click “Save”.**



6. **Save the created file（VocAuthInfo_XXXXXXXX_XXXXXX.txt）to a suitable location such as a USB memory stick or a computer hard disk.**
7. **Copy the saved file to another computer connected to the internet.**



8. **Open the following "Activation" page with a web browser on a computer connected to the internet.**
   **https://www.vocaloid.com/en/activate/**
9. **Open the copied file (VocAuthInfo_XXXXXXXX_XXXXXX.txt) with a text editor and copy and paste the contents into the text box on the activation page.**
10. **Click "Activate" and download the authorization file (VOCALOID_ActivationKey.txt).**

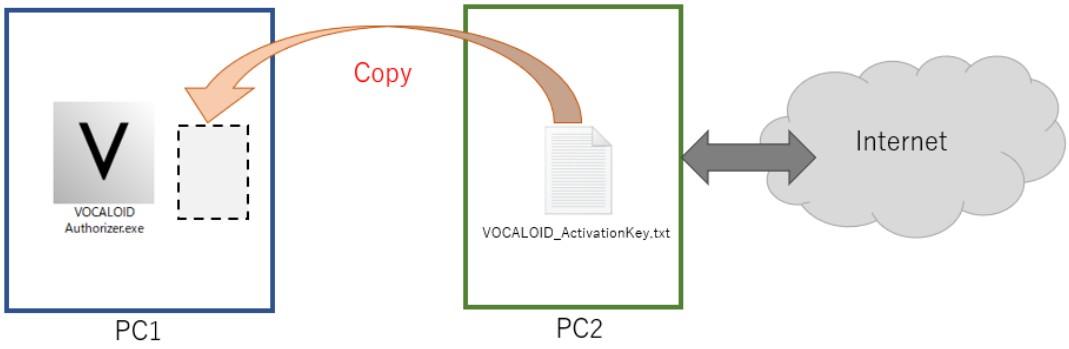
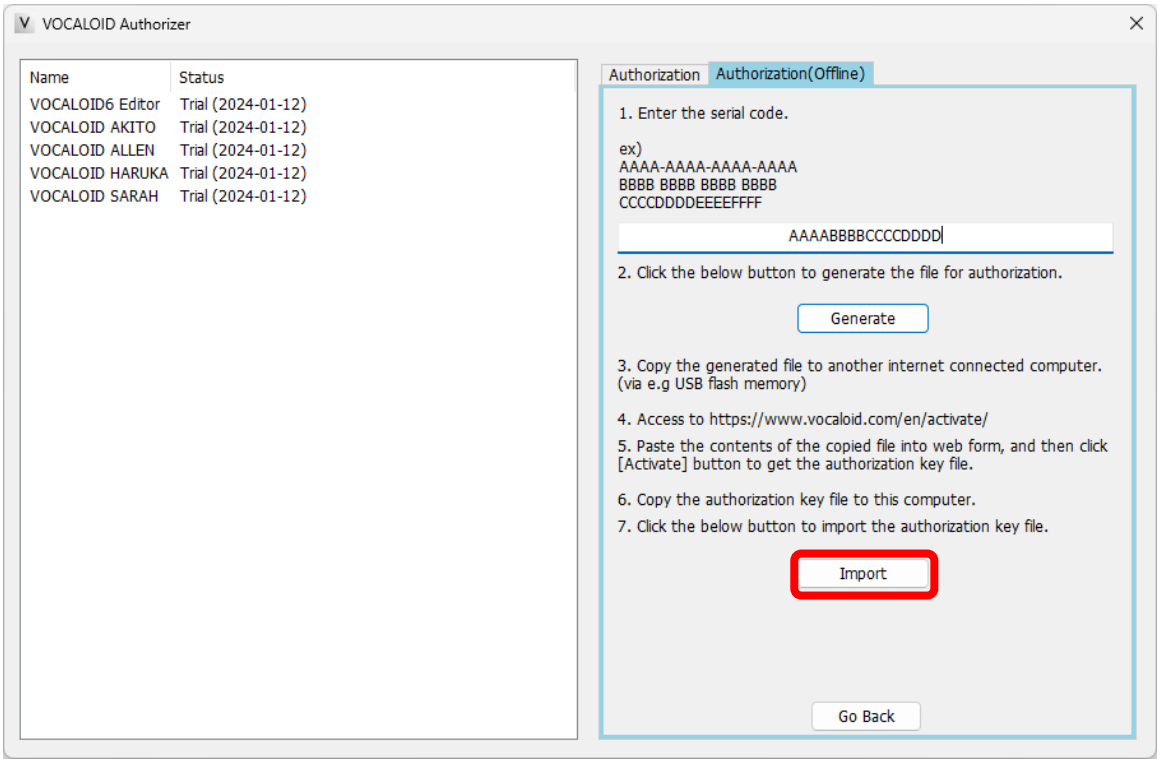
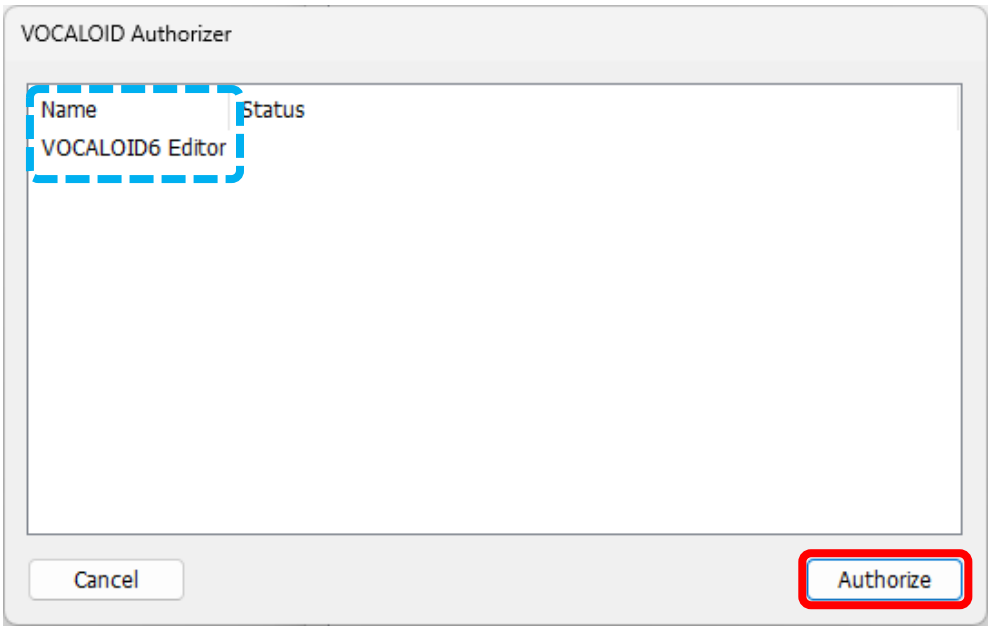
11. **Copy the downloaded authorization file(VOCALOID_ActivationKey.txt) to the computer where VOCALOID Authorizer is installed.**



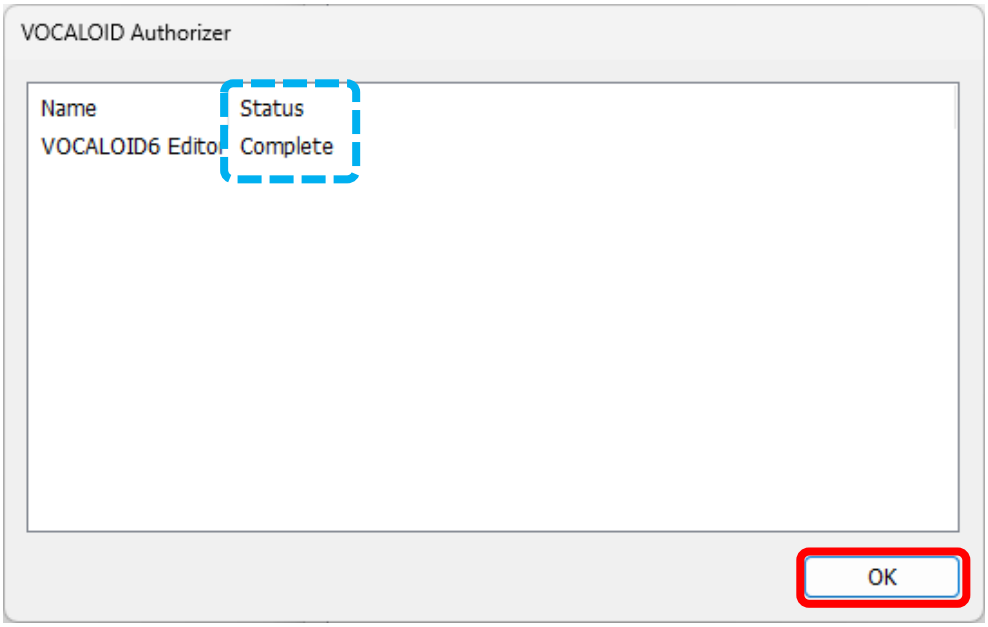
12. **Click "Import" and open the copied authorization file (VOCALOID_ActivationKey.txt).**



13. **Check the name of component to be authorized and click “Authorize”.**



14. **Check and make sure the status in the list “Complete” and then click “OK”.**



This completes the offline authorization procedure. Close VOCALOID Authorizer.

# Deauthorization

## Deauthorization of Products

Be sure to deauthorize VOCALOID Editor product, Plugin product and Voice bank product prior to uninstalling them. If you uninstall a product without first deauthorizing it, you will not be able to authorize it if you install it on a new computer.

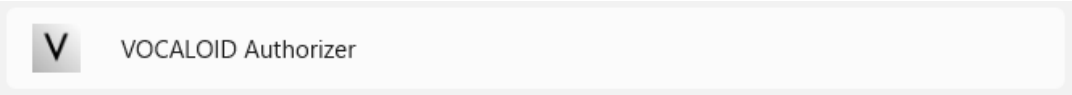
## Notes on Deauthorization

Your computer must be connected to the internet to perform deauthorization.

| If the computer that the product being deauthorized is installed on is connected to the internet: | If the computer that product being deauthorized is installed on is not connected to the internet: |
|---|---|
| You can perform deauthorization as-is on the computer on which the product was installed. For details, see the “Online Deauthorization Procedure” below. | Use a different computer, which is connected to the internet, to perform deauthorization. For details, see the “Offline Deauthorization Procedure” below. |

## Online Deauthorization Procedure

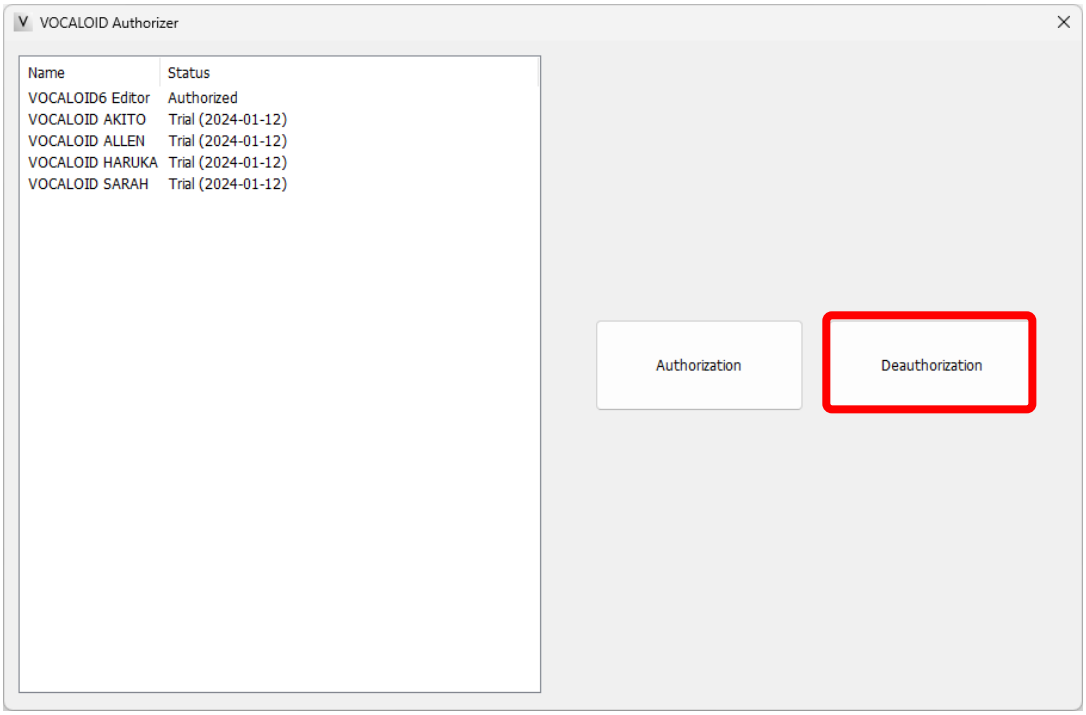
1. **Start VOCALOID Authorizer.**



On Windows, start the tool from Start menu → “VOCALOID” → ”VOCALOID Authorizer”.

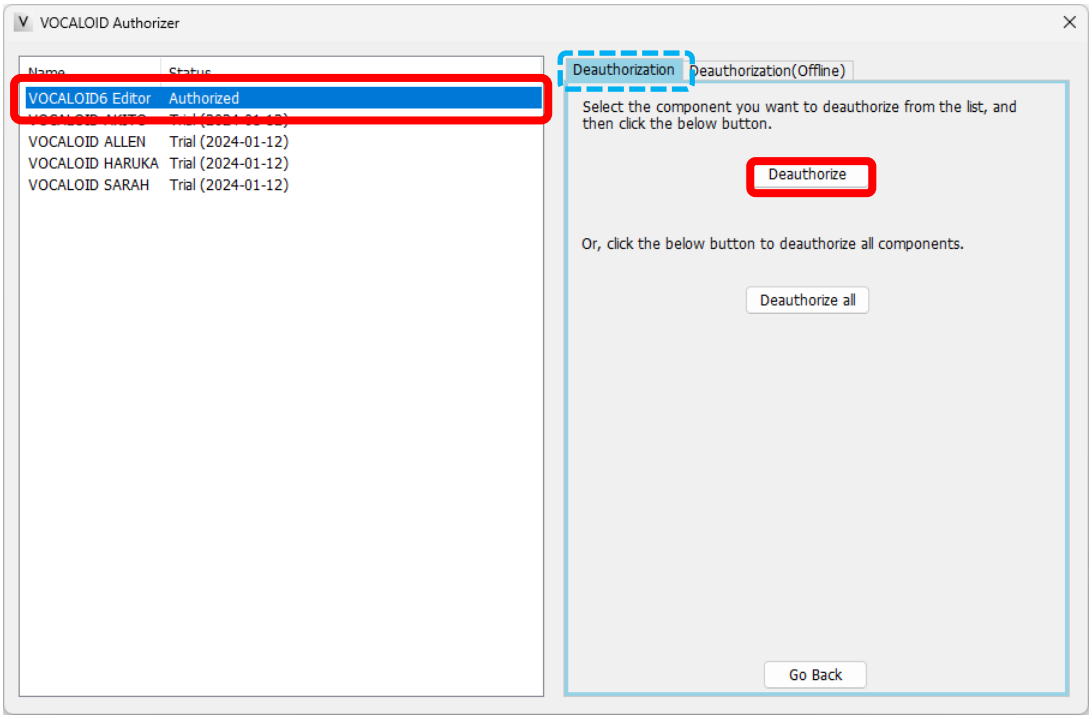
On macOS, start the tool from “Application” → “VOCALOID” → ”VOCALOID Authorizer”.

2. **Click “Deauthorization”.**



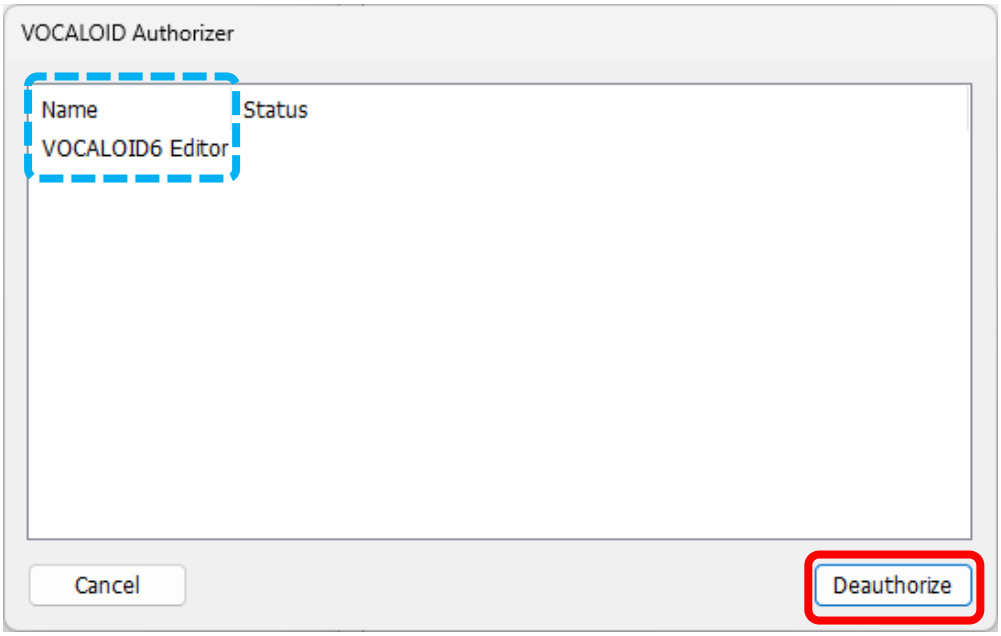
3. **Make sure the “Deauthorization” tab is activated.**

4. **Select the components you wish to deauthorize and then click “Deauthorize”.**

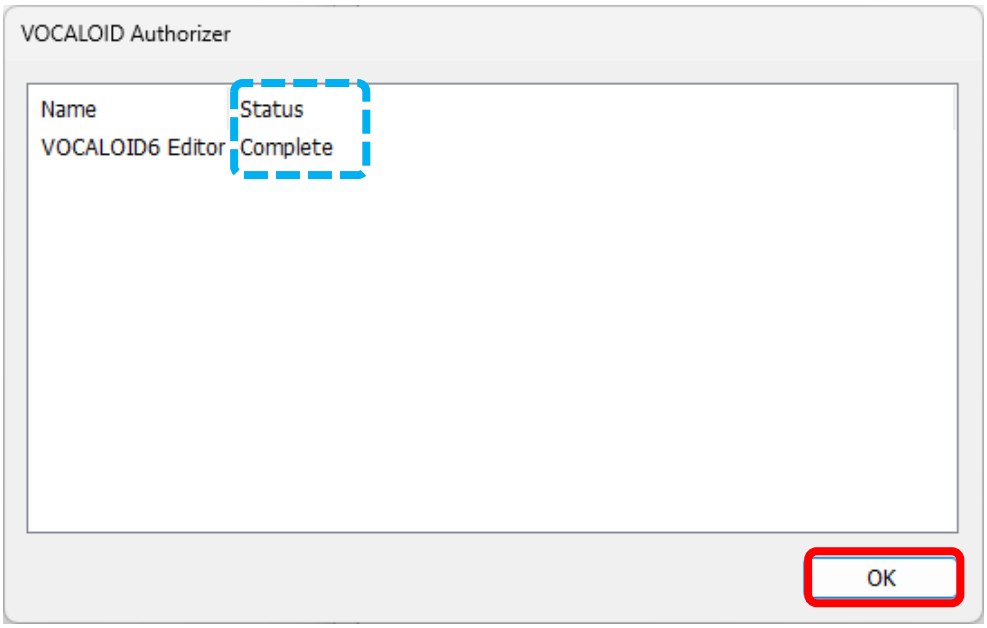


If you wish to deauthorize all components, click “Deauthorize all”.

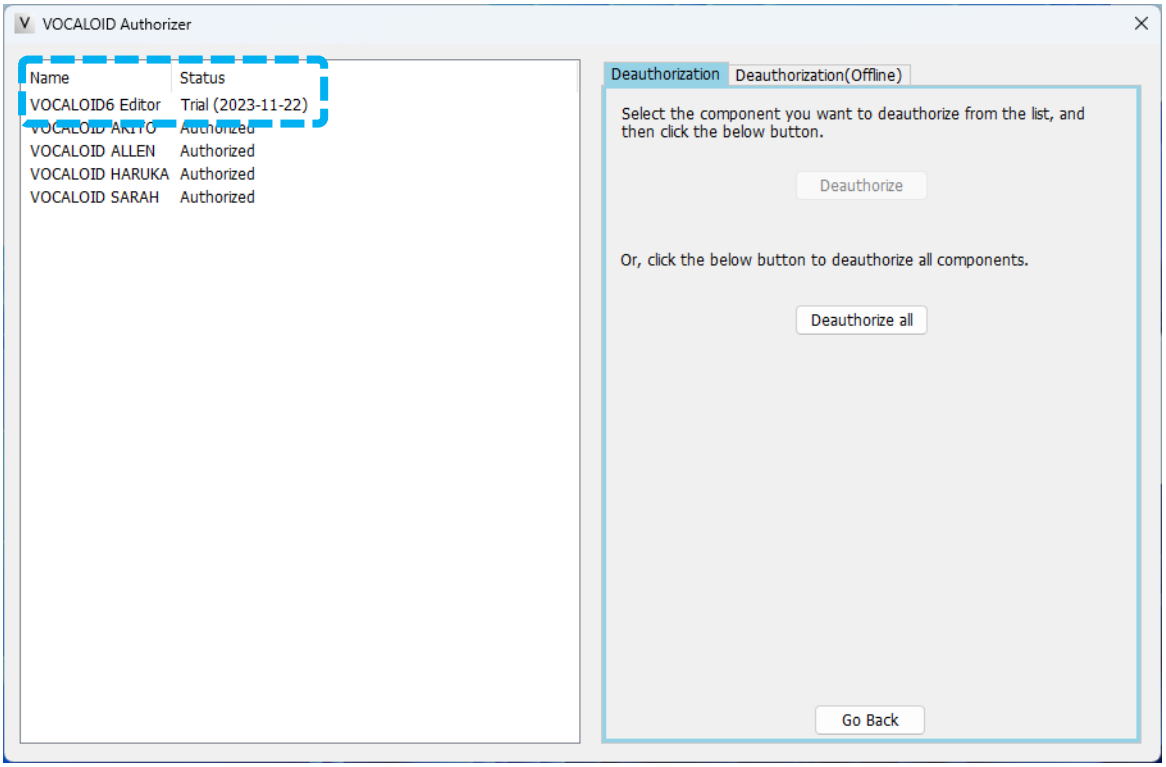
5. **Check the name of component to be authorized and click “Deauthorize”.**



6. **Make sure the status in the list is “Complete,” and then click “OK”.**



7. **Make sure the status of the components is “Unauthorized” (If during trial period, “Trial”).**

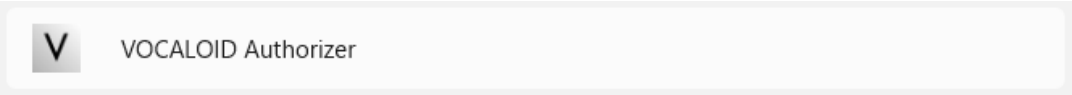


This completes the online deauthorization procedure. Close VOCALOID Authorizer.

## Offline Deauthorization Procedure

Please use offline deauthorization only if the computer on which you installed the product cannot connect to the Internet. Offline deauthorization requires a second computer which can connect to the internet in addition to the computer where you installed the product. You will also need an external storage device such as a USB memory to copy files, so please prepare it in advance.

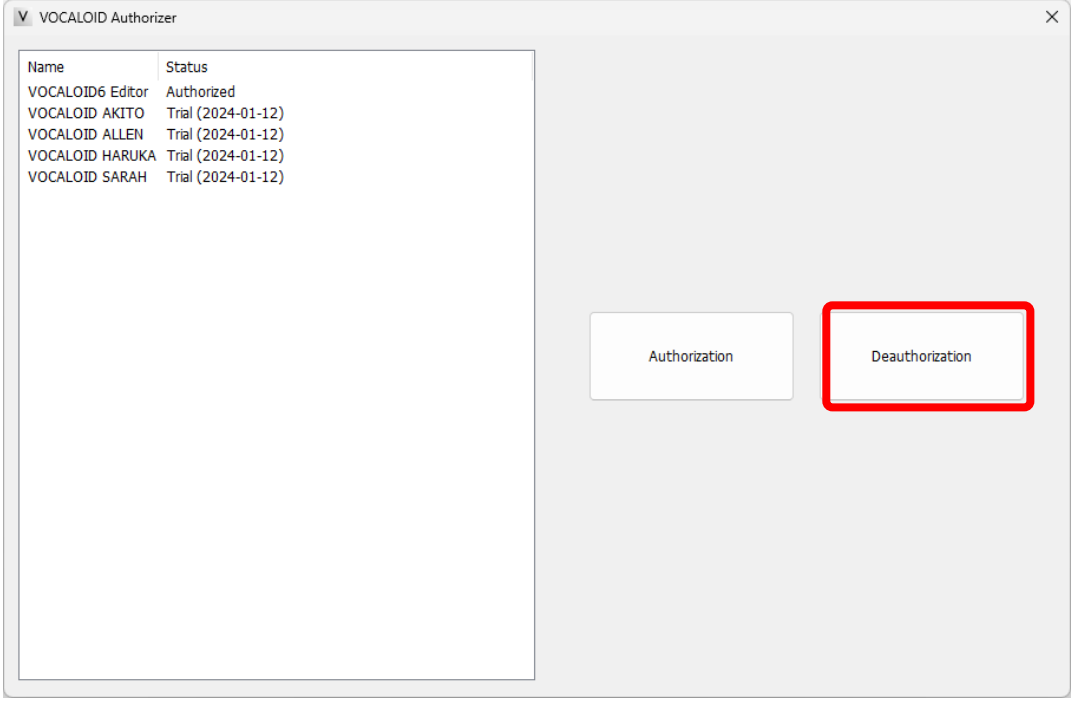
**1. Start VOCALOID Authorizer.**



On Windows, start the tool from Start menu → “VOCALOID” → ”VOCALOID Authorizer”.

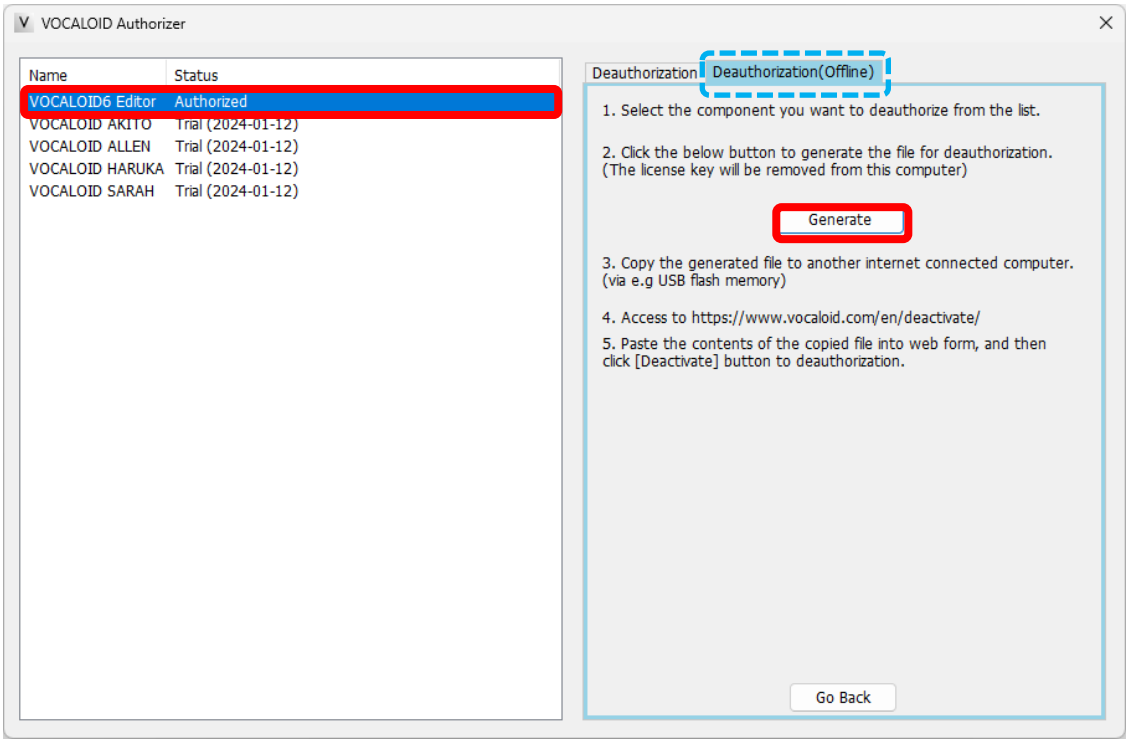
On macOS, start the tool from “Application” → “VOCALOID” → ”VOCALOID Authorizer”.

**2. Click “Deauthorization”.**

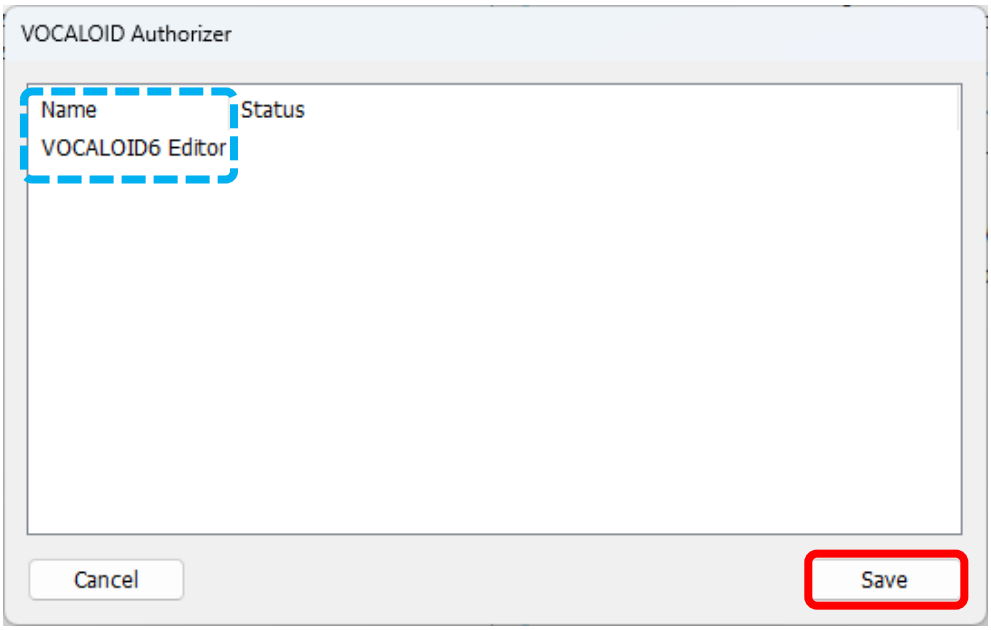


3. **Click “Deauthorization(Offline)” tab.**

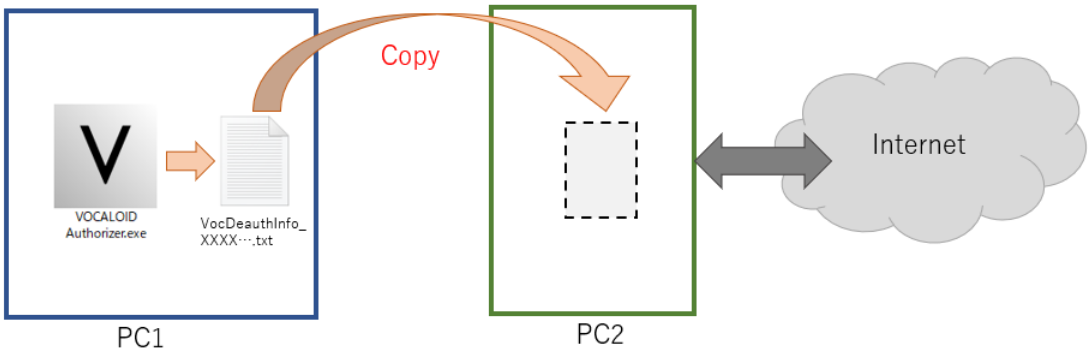
4. **Select a component you wish to deauthorize and click “Generate”.**



5. **Check the name of component to be deauthorized and click “Save”.**



6. **Save the created file（VocDeauthInfo_XXXXXXXX_XXXXXX.txt）to the suitable location such as a USB memory or computer hard disk.**
7. **Copy the saved file to another computer connected to the internet.**



8. **Open the following “Deactivation” page with a web browser on a computer connected to the internet.**
   **https://www.vocaloid.com/en/deactivate/**
9. **Open the copied file (VocDeauthInfo_XXXXXXXX_XXXXXX.txt) with a text editor and copy and paste the contents into the text box on the Deactivation page.**
10. **Click “Deactivate”.**
